

STOCK TRUSSES

Trusses Built With "Superior" Quality

www.superiortrusses.net

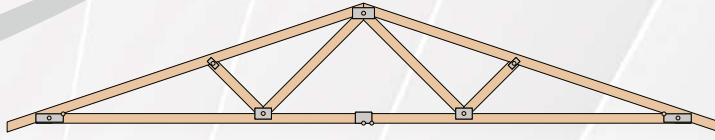

Welcome...

Superior Trusses LLC was founded in 2005 in Denver, PA as a family-owned business. Our vision is to meet the growing need for high-quality roof components delivered on time and at competitive prices.

After spending time in the building industry, we recognized a need in the truss market for quality and affordable components produced in a timely manner. No matter how unique your design is, we have the ability to both design and build a truss that will not only be correct for your building, but also a product that is high quality.

At Superior Trusses, we handle residential, agricultural, and commercial needs, so whether it is a house, barn, shed, warehouse, or whatever else you might be building, we can deliver a product that will fit your exact need.

PRE-BUILT STOCK TRUSSES

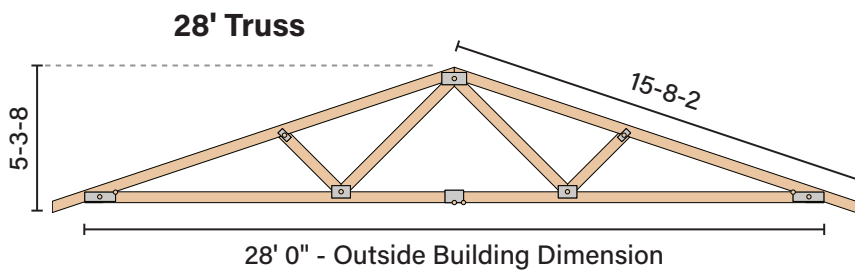

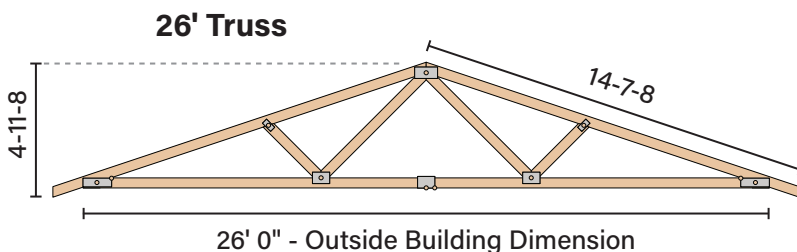

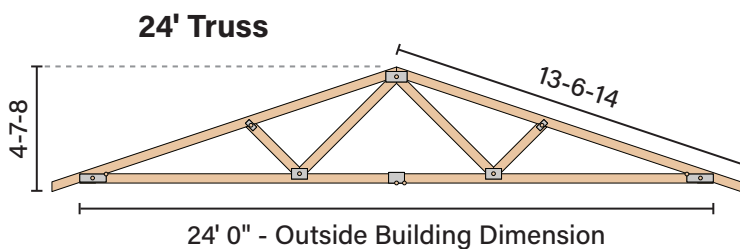

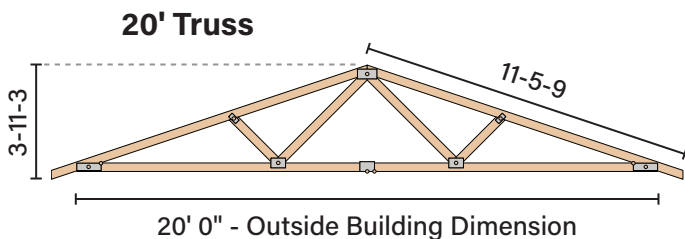

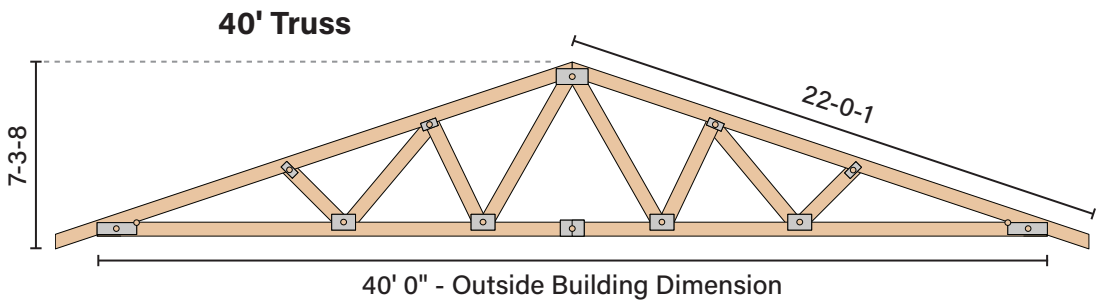

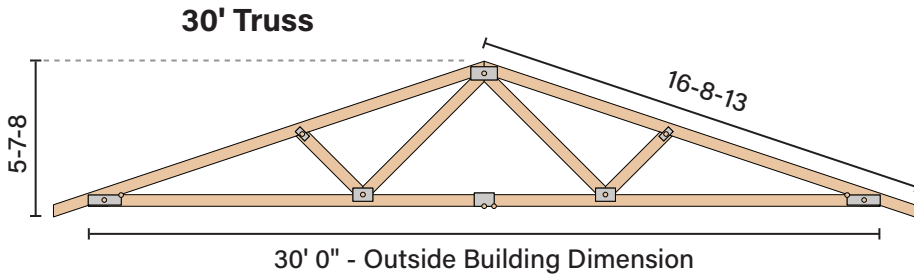

-
- Quality lumber selection
 - To build a superior truss, we believe in selecting lumber with minimal flaws and high strength
 - Designed and Engineered for a 40# snow load at 4' spacing
 - Other custom order trusses are available with short lead times

“We are a TPI Inspected Manufacturer”

HIGH-QUALITY TRUSSES

On time and at competitive prices

01

We have a team of expert designers that have the skill and experience to enable us to design a truss to your desired specifications, and deliver a top quality product to your jobsite.

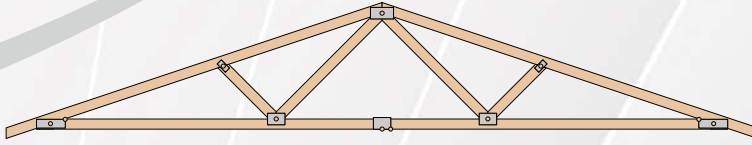

02

We produce trusses for roofs, as well as floor trusses. All trusses that we sell are designed and manufactured in our state of the art facility located in Lititz, Pennsylvania.

03

We have partnered with Superior Truss Hauling for our delivery and crane needs. The partnership allows us to deliver and set your trusses in an affordable and timely manner.

SUPERIOR STOCK TRUSSES

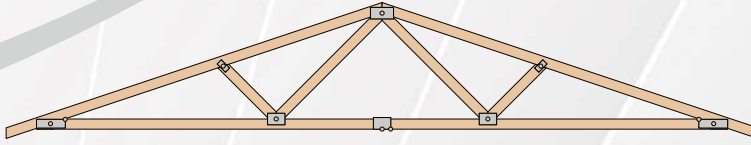

What we do to make a SUPERIOR STOCK TRUSS

In today's truss world, our truss is considered over-engineered.

- Quality lumber selection
- All stock trusses are rated at 40-5-5 at 4 foot spacing
- We are a TPI Inspected Manufacturer
- Even with our high-quality lumber sources, we still cull 5-7% at the cutting phase for quality control
- Our laser-assisted truss assembly system keeps trusses at uniform dimensions
- The personnel of Superior Trusses are trained to focus on quality from unloading lumber to truss loading; from beginning to end

SUPERIOR QUALITY • AFFORDABLE PRICES
TOTAL SATISFACTION

PRE-ENGINEERED TRUSSES

4/12 Pitch • 10½" Overhangs
40lb Snow Load
